Hi! I'm a passionate individual looking to master and hone my skills in HTML, CSS, Javascript, PHP and more to build beautiful and useful websites. With sufficient knowledge of good UI/UX design, I can develop sites from scratch and provide good user experience to meet client needs.

projects.

UX Designer, Data Entry & Full-Stack Developer — Minisize
February 2022-June 2022

Created the UI design for product pages & the blog page. Involved in collecting, inputting and maintaining the whole database of the project using PHPMyAdmin. Coded the *blog pages*, integrating Bootstrap values & fetching data from the database using PHP.

UI/UX Designer & Full-Stack Developer   — SocioSweet
September 2021-January 2022

A social media clone website catered to females. Made a Figma design and individually worked on developing the website from scratch (involved HTML, CSS, Javascript, SQL & PHP).

UI Designer & Front-end Developer   — Dezato
February 2021-June 2021

A single-page multi-device website themed on showcasing Japanese sweets. Used Javascript to show a night-mode effect that changes the colour scheme, images & information when the user clicks on another type.

UI Designer & Front-end Developer   — Fate's Choices
February 2020-June 2020

A non-linear hypertext website where the user's choice determines the ending. Created the storyline, UI design and coded the front-end development, specifically using grid and basic animations to create an interactive experience.

education.

Bachelor of Creative Computing — Bath Spa University, UAE
Sept 2019-June 2022   Class A Student

skills.

Technical	Design	Frameworks/Libraries
HTML	UX/UI Design	React
